

## JOIN OUR TEAM

### Role: *Assembly Technician*

#### Job Description:

Fitz-Thors Engineering is a solutions provider for medical devices, industrial services, and product development. We are in search of an assembly technician who can produce solutions for our customers' manufacturing challenges.

#### Roles and Responsibilities:

- Assemble custom developed systems according to engineered drawings.
- Conduct product tests and record the results prior to packaging.
- Inspect quality and accuracy for parts and assemblies prior to shipping.
- Perform cleaning for incoming and outgoing parts.
- Perform installation, repair, inspection, reassembly, replacing, refitting, and adjusting as required.
- Package parts and systems to prepare for shipping.
- Assist in inventory management.
- Cut, machine, and assemble MayTec extrusion based on a BOM drawing.
- Assist in fabrication as time allows.
- Assist in facility improvements as time allows.
- Load and operate a waterjet and plasma machine.
- Some onsite installation may be required.
- Perform preventive maintenance on some shop equipment.
- Report to Shop Floor Manager

#### Qualifications and Requirements:

- Proficient in hand tool assembly.
- Knowledge in reading engineered drawings.
- Excellent interpersonal communications.
- Computer skills – familiar with all Microsoft Office applications.
- CAD knowledge a plus (SolidWorks, DraftSight).
- Manual machining skills a plus.
- Must be able to lift 50lb.
- Forklift certified a plus.
- Standing for several consecutive hours may be required.
